

RadPHP™ XE2

The fastest way to build applications for Web, Facebook and mobile

NEW IN RADPHP XE2

- Build touch-optimized mobile web apps for phones and tablets
- Mobile page designer
- Deploy standalone mobile apps to iOS and Android
- Incorporate device functionality into mobile applications
- Expanded Zend Framework component set

Key Product Features

- PHP editor with coding tools
- Powerful Integrated debugger
- Performance profiling
- Database and query tools
- Visual form designer
- HTML visual designer
- Library of over 200 components
- Project management tools
- Facebook and jQuery components
- DataSnap™ connectivity
- Component-based database connectivity

Embarcadero® RadPHP™ XE2 provides the fastest way to build Web, Facebook®, and touch-enhanced mobile phone and tablet applications with the only visual PHP IDE and framework. RadPHP XE2 offers over 200 drag-and-drop PHP components for visually building UIs, displaying and interacting with data and services such as Google maps and Facebook, along with integrated coding, debugging, performance profiling, and database connectivity.

DEVELOP FASTER WITH THE ONLY VISUAL PHP IDE

RadPHP is the only PHP development solution with drag-and-drop visual design. RadPHP provides both code and design views of PHP applications and HTML pages in the integrated development environment (IDE). Use the visual design view in RadPHP to build user interfaces and database connections by simply dragging and dropping components onto a form. Changes in code and the visual designers are always kept in sync.

CREATE MOBILE APPS AND MOBILE WEB APPS

Use RadPHP to create web applications that are optimized for mobile phones and devices. Your apps will look great and give your users functionality similar to native mobile apps. You can also build apps that interact with mobile device hardware including cameras, accelerometers, and GPS – and distribute them via the Apple and Android app stores.

GET ALL THE TOOLS YOU NEED FOR PHP WEB DEVELOPMENT

RadPHP delivers a complete IDE with all the tools you need for PHP coding and development. The customizable source code editor, integrated debugging, performance profiling and wizards for everything from new application creation to mobile deployment help simplify tasks and make your development more productive every step of the way.

THE FASTEST WAY TO BUILD APPLICATIONS FOR FACEBOOK

With RadPHP you can quickly create applications for the popular Facebook social networking site. The included Facebook application wizard guides you through the steps to build your application and you can use the built-in components to easily incorporate Facebook functionality including user information and friend lists.

embarcadero®

Insight

Features	Description
Integrated Development Environment (IDE)	
Visual PHP design surface and HTML visual designers	Create user interfaces, web pages, and template forms via drag-and-drop
Two-Way-Tools	Automatically synchronizes code between editor and form designer
Object inspector	Enables visual customization of PHP and AJAX components without writing code
Code explorer	Simplifies PHP source code navigation
PHP Project Manager	Helps you view and organize project files
Structure Pane	Shows the hierarchy of components displayed on the designer
International encodings and characters	Supports international encodings and character sets
History Manager	For automatic multi-level file backups, file differencing and restore
Customizable PHP source code editor	Includes color syntax highlighting which makes spotting syntax easier
Integrated XDebug debugger	This faster and more powerful debugger helps you find and fix errors
Integrated PHP profiler	Helps you locate performance bottlenecks
RadPHP Component Library	
Customizable palette	Includes more than 200 reusable components
Standard components	Supports frames, menus, buttons, checkboxes, radio buttons, scroll bars, panels, action lists, and validation
Advanced components	Includes image button, Flash object, image list, rich edit, progress bar, calendar, tree view, timer, web services, PEAR data grid, jQuery, Google Maps and many more
Database components	Enables access to databases, tables, queries, and stored procedures, as well as data grids and navigation plus native database components for MySQL, InterBase, and Oracle
Expanded in XE2! Components for the Zend framework	35+ New Zend Framework components help simplify web development
Components for Facebook	Ease the development of applications for Facebook with components for Facebook applications, permission, friends, sharing and more
Extensibility	Extend the RadPHP component library at any time with third-party libraries or with your own custom components
Database Application Development	
Data Explorer	Browse database server-specific schema and objects
Support for additional databases in the Data Explorer	Includes Oracle, Microsoft SQL Server, MySQL, PostgreSQL, DB2, Sybase, Informix, SQL Anywhere and InterBase
Drag and Drop	Supports drag and drop from the Data Explorer to the visual designer to create data-driven apps with no coding
Native database components	Supports Oracle, InterBase and MySQL
DataSnap connectivity	Build client applications with RadPHP and connect to DataSnap servers built with Delphi and C++Builder
Mobile Development	
New in XE2! Mobile optimized web apps	Build mobile-optimized touch-friendly web applications for most mobile devices in the market
New in XE2! Visual Mobile Designer	Visual Mobile Designer to see how the app will look on the real device
New in XE2! Build native mobile apps	Convert PHP apps into native mobile apps for iOS and Android
New in XE2! Interact with mobile device hardware	Interact with the mobile device hardware, like GPS, accelerometer, camera, etc
