solarwinds

Log & Event Manager
LOG COLLECTION, ANALYSIS & REAL-TIME CORRELATION
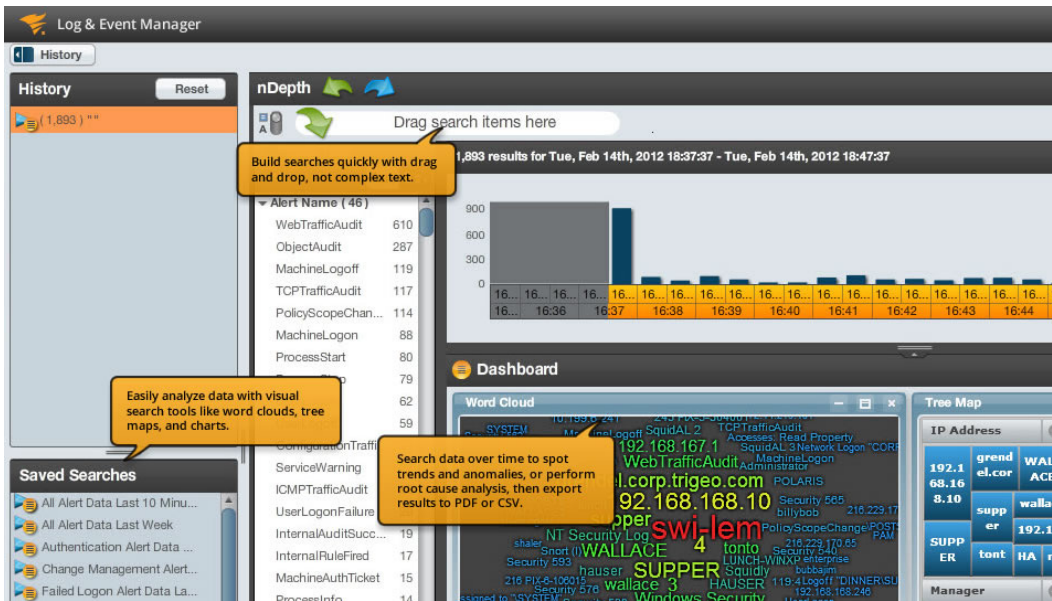

SolarWinds® Log & Event Manager delivers powerful Security Information & Event Management (SIEM) capabilities in a highly affordable, easy-to-deploy virtual appliance. It combines real-time log analysis, event correlation, and a groundbreaking approach to IT search to deliver the visibility, security, and control you need to overcome everyday IT challenges. SIEM software has never been easier to use or more affordable.

Log & Event Manager at a Glance

• Collects log and event data from tens of thousands of devices and performs true real-time correlation

• Powerful Active Response technology enables you to quickly and automatically take action against threats

• Advanced IT Search employs highly effective data visualization tools (e.g. word clouds, tree maps, and more)

• Quickly generates compliance reports for PCI DSS, GLBA, SOX, NERC CIP, HIPAA, and more

• Out-of-the-box correlation rules, reports, and responses enable speedy deployment in an hour or less

Features

Low-cost & Straightforward Pricing Model
Log & Event Manager's node-based licensing model is designed to minimize budget impact and help you better manage your IT budget.

Easy Collection of Network Device, Machine & Cloud Logs
Log & Event Manager collects and catalogs log and event data, in real-time, from anywhere data is generated within your IT infrastructure.

Real-time, In-memory, Event Log Correlation
By processing log data before it is written to the database, Log & Event Manager delivers true real-time log and event correlation, enabling you to immediately troubleshoot and investigate security breaches and other vital issues.

Scalable Log Data Collection & Analysis
Log & Event Manager lets you to scale across multiple datacenters and geographies by easily adding more nodes.

Out-of-the-Box Security & Compliance Reporting Templates
Log & Event Manager makes it easy to generate and schedule compliance reports quickly using over 300 audit-proven templates and a console that lets you customize reports for your organization's specific compliance needs.

Quick & Simple to Deploy & Use
Log & Event Manager is quick and simple to deploy. You can be up and auditing logs in no time using our virtual appliance deployment model, Web-based console, and intuitive interface.

Cutting-edge IT Search for Event Forensic Analysis
Log & Event Manager's advanced ad-hoc IT search capability makes it easy to discover issues using a drag-and-drop interface that tracks events instantly. You can even save common searches for easy future reference.

Built-in Active Responses for Operational Security & Compliance Issues
Log & Event Manager enables you to immediately respond to security, operational, and policy-driven events using built-in Active Responses that take actions such as quarantining infected machines, blocking IP addresses, and more.

USB Defender Technology
Log & Event Manager eliminates endpoint data loss and protects sensitive data with real-time notification of USB devices and the ability to block their usage, as well as built-in reporting to audit USB.

Log Data Compression & Retention
Log & Event Manager stores terabytes of log data at a high compression rate for compliance reporting, compiling, and off-loading – reducing external storage requirements.

"SolarWinds Log & Event Manager truly is an amazing tool with no limitations. I don't know of anything else on the market today that can match the quality of results Log & Event Manager delivers."

- Ted Carmack, IS Manager, Energy Federal Credit Union

System Requirements

HARDWARE	MINIMUM REQUIREMENTS
CPU	Dual processor, 3GHz
Memory	8GB RAM minimum recommended
Hard Drive	250GB
SOFTWARE	**MINIMUM REQUIREMENTS**
OS/Virtual Environments	VMware ESX/ESXi 4.0+ Hyper-V Server 2008 R2
Database	Integrated with Virtual Appliance

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.
